Welcome

JUNE is National Men’s Health Month, a time to focus on the men in our lives, making sure they get the care that they need. Women are 100 percent more likely than men to visit the doctor for annual exams and preventative services, so this month use National Men’s Health Week from June 13 through Father’s Day on June 19 as a reminder to make time to visit a doctor.

Men’s Health Month

THERE is a “silent health crisis,” as medical professionals put it, among men in the U.S. American men die at higher rates than women from the top ten causes of death, including heart disease and cancer. Men are victims of more than 92 percent of workplace deaths and have higher death rates for unintentional injuries. In 1920, women lived an average of

one year longer, but as of 2013 women live an average of five years longer. To address this, Men's Health Month became an annual observance to help raise awareness and get men to pay attention to their health.

Congress created Men’s Health Month in 1994, designating the week ending in Father's Day to take advantage of the extra attention on men. It was created to heighten awareness of preventable health problems and encourage early detection and treatment of disease among men and boys. From there, it grew into International Men's Health Week and then Men's Health Month.

Here’s what men can do to improve their health:

- Men make half as many visits as women for preventive care. Check the chart to the right to make sure you’re up-to-date on your preventative care;
- A higher percentage of men have no healthcare coverage. Look into your healthcare options at connectforhealthco.com/get-started/individualsfamilies/ and contact TCHN by calling 970-708-7096 or emailing info@tchnetwork.org if you need help enrolling;
- While women report suicidal thoughts more often than men, 4 times as many men die from suicide than women. If you feel stressed or overwhelmed, take care of yourself. Avoid drugs and alcohol. Find support. Connect socially. Stay active.

Talk to your doctor about your specific health risk. You can get your blood pressure and cholesterol checked by your local Community Health Worker.

SWCAHEC is a non-profit organization focused on improving rural health in southwestern Colorado with an emphasis on supporting rural primary care, community health, and health professional education. The Star Awards are designed to celebrate nurses, which aligns well with National Nurse’s Day on May 6. The day marks the beginning of National Nurse’s Week, ending on May 12, Florence Nightingale’s birthday, according to the American Nurses Association.

Ballantyne was uncertain about applying to work at TCHN, she says, but was encouraged by friends. With her job as clinical associate, every day is different with a new challenge, she says, and she enjoys that she learns something new every day.

“I live through the successes of my patient health navigators and community health workers and knowing that they’re making a difference out there and we’re working on a meaningful initiative.”

The Star Awards were presented at SWCAHEC’s National Nurse’s Week celebration on May 5.

loves her job and we’re both adrenaline junkies, so I thought, ‘that sounds fun.’”

So, Ballantyne went back to school in her mid-40s to become a Registered Nurse. She worked in various nursing positions at both Montrose Memorial Hospital and Delta County Memorial Hospital before joining Tri-County Health Network (TCHN) three years ago. Now, Ballantyne was nominated for the Rising Star Award as part of the Star Awards from Southwestern Colorado Area Health Education Center (SWCAHEC).

“I guess I’ve found my niche with this job, which I never really realized,” Ballantyne says. “Where if something’s not working right, then I really would like to try to change it or see how we can improve it.”

June Recipe

Keep an eye on our website and social media for updates on our Cooking Matters classes to learn how to cook heart healthy meals. This summer save yourself some time for fun in the sun and prepare this great 30-minute meal for your lunch or dinner.

Cheesy Hamburger Skillet

Serving Size
Serves 4, 2 cups per serving

Ingredients
- 2 cups whole wheat macaroni
- 1 small bell pepper
- 1 small onion
- 3 cloves garlic
- 3 ounces reduced fat cheddar cheese (3/4 cup shredded)
- 1 pound lean ground beef or turkey
- 1 (14 ounce) can diced tomatoes, no salt added
- 1 Tablespoon dried Thyme leaves
- 1/2 teaspoon salt
- 1/4 teaspoon ground black pepper

Materials
- Large pot
- Colander
- Large skillet with lid
- Wooden spoon or spatula
- Sharp knife
- Measuring spoons
- Cutting board
- Can opener
- Cheese grater

Instructions

1. Cook macaroni according to package directions. In a colander, drain macaroni and rinse with cool water.

2. While macaroni is cooking, rinse and dice bell pepper. Peel and finely chop onion. Peel and mince garlic. Set aside.

4. In a large skillet over medium heat, cook beef or turkey, onion, bell pepper, and garlic, crumbling the beef with a wooden spoon or spatula, until the beef is no longer pink, about 15 minutes. Using a colander, drain off fat.

5. Return to the skillet and stir in drained macaroni, tomatoes with juices, thyme, salt, and pepper. Sprinkle with cheese. Cover and cook over medium heat until cheese is melted, 5 to 7 minutes.

Chef's Notes

Plenty of vegetables could be added to this dish - let your imagination soar! Try fresh or frozen peas, peppers, spinach or other dark leafy greens, broccoli, cauliflower, zucchini or summer squash.

Cooking Matters: Upgraded

TCHN’s Cooking Matters classes, which focus on teaching the community how to cook healthy, budget-friendly meals, will get an upgrade this summer with a new host site: the West End Economic Development Corporation (WEEDC) Coworking Space and Community Kitchen in Naturita. The new space, which opens to the public on July 22, features a 4,000 square foot coworking space with high-speed internet, hot desks and private offices, and event and meeting space. In addition, there is a community kitchen with a commercial gas range and oven, reach-in refrigerator and freezer, mixer, kettle-steamer, three-compartment sink, work tables, and space for classes.

“We want this building to become a destination for workers, freelancers, and tele-workers,” says Samia Singleton, Economic and Community Development Coordinator for WEEDC. The new space, which opens to the public on July 22, features a 4,000 square foot coworking space with high-speed internet, hot desks and private offices, and event and meeting space. In addition, there is a community kitchen with a commercial gas range and oven, reach-in refrigerator and freezer, mixer, kettle-steamer, three-compartment sink, work tables, and space for classes.

“We want this building to become a destination for workers, freelancers, and tele-workers,” says Samia Singleton, Economic and Community Development Coordinator for WEEDC. The new space, which opens to the public on July 22, features a 4,000 square foot coworking space with high-speed internet, hot desks and private offices, and event and meeting space. In addition, there is a community kitchen with a commercial gas range and oven, reach-in refrigerator and freezer, mixer, kettle-steamer, three-compartment sink, work tables, and space for classes.

The goal for the building, she says, is to stimulate job growth, new businesses, and provide affordable office space for the community. To access the space once it opens, people will need to become a member of the Collective Mine and members will have 24-hour access to the building. For information on the Collective Mine and how to become a member, email weedc@choosewestend.org. You can get a sneak peek of the building and kitchen at TCHN’s Cooking Matters class on July 5 from 4pm - 6pm.

Rethink Your Drink

This summer, rethink your drink to stay hydrated in the heat. Sugary drinks are the leading single source of empty calories in young people’s diets and directly contribute to diet-related diseases including obesity and diabetes. Empty calories from added sugars and solid fats contribute to 40 percent of total daily calories for 2–18 year olds and half of these empty calories come from six sources: soda, fruit drinks, dairy desserts, grain desserts, pizza, and whole milk. Check out the infographic below and this handy chart from the Centers for Disease Control and Prevention (CDC) on ways to adjust what you drink.

Happy Father’s Day to all of the fathers out there!
